

## Instructions to setup Gluster cluster:

- VM image that can be cloned will be handed over at the tutorial, KVM hypervisor is recommended.
  - The VM has the following things setup:
    - Centos 7.1 + 2GB RAM + 3 bricks 2 GB each
    - Gluster 3.7.4, Samba, Ctdb packages installed
  - Clone the VM image to create 3 VMs
  - Configure the network, IP and the hostname
- The VMs are now ready to be used for Gluster hands on.
